The date on which the petition under 37 CFR 1.136(a) and the appropriate extension be been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension are 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or let forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if led, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).
1.	A Notice of Appeal was filed on Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.
2.	The proposed amendment(s) will not be entered because:
(a	they raise new issues that would require further consideration and/or search (see NOTE below);
	they raise the issue of new matter (see Note below);
(c)	they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
(ď	they present additional claims without canceling a corresponding number of finally rejected claims.
	NOTE:
3.🛛	Applicant's reply has overcome the following rejection(s): See Continuation Sheet.
4.	Newly proposed or amended claim(s) would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
5.🛛	The a) ☐ affidavit, b) ☐ exhibit, or c) ☒ request for reconsideration has been considered but does NOT place the application in condition for allowance because: <u>See Continuation Sheet</u> .

2/6/04 Art Unit: 1722

Continuation of 3. Applicant's reply has overcome the following rejection(s): Entry of the amendment upon filing of an Appeal would overcome the rejection of the claims under 35 USC 112, second paragraph, as well as the objection of the claims for lack of antecedent basis.

Continuation of 5. does NOT place the application in condition for allowance because: it would have been obvious to a skilled artisan to modify the shape of the mold cavities of the mold apparatus taught in Ochiai et al. '831 by providing the shape of the mold cavities of any conventional mold cavity shape as disclosed in any of the secondary references, since such mold cavity shapes have recognized utility in a mold apparatus for formation of solder bumps/balls, as described in the last Office Action. Moreover, claim recitations of intended use do not patentably distinguish apparatus claims, as described in the last Office Action.
